TK5 Driver Access & Fleet Management

TK5 TruckLOG is the UK's best selling independent MHE fleet management system.

Key Benefits

- Improved safety
- Improved compliance
- Improved performance
- Increased cost saving
- Web based management interface
- Can be fitted to all MHE equipment

Safety - Driver Access Control

Easy to use: Each Driver's RFID card or fob identifies:

- Name
- Truck Licences
- Licence expiry dates
- Department

- This ensures only trained drivers are operating equipment they are licenced to do so

- Removes the need for keys
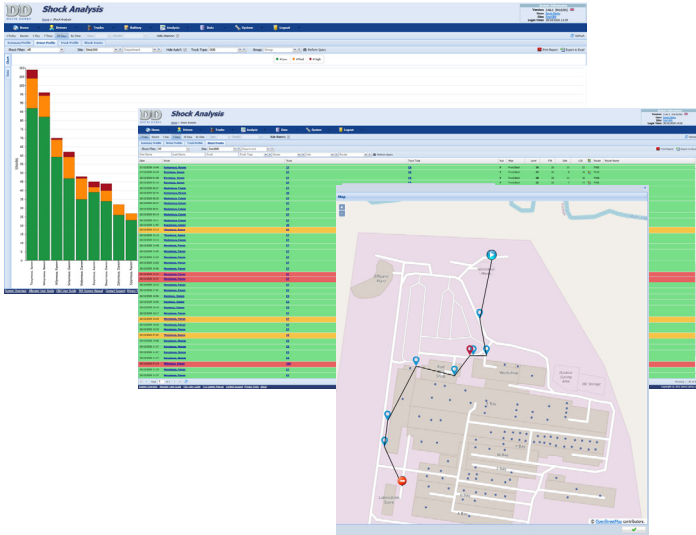

- Messages can be sent to driver and acknowledged

Compliance - Pre-Operational Checks

- Easy Touchscreen / Button driver interface

- Ensures trucks comply with Safety criteria

- Randomised buttons to encourage driver attention

- Questions can be updated by the site, as required

- Trucks can be automatically isolated on serious faults

- Email and / or SMS alerts

Safety - Shock Analysis

**Change attitudes with instant notifications of driver impacts.**

• Encourage better driving by Identifying driver trends

• Accidents are reported due to increased accountability

• Reduces damage costs

• Perform safety audits using reported data

• Email and / or SMS alerts
